There will be an Eclipse of the Moone, the xxiiij. day of Ianna-  
rie, a little after vi. a clock in the morning.

## Diuers necessarie elections, concerning

**I**f any of the foure naturall powers, seruing for nutrition be weakened, and so not able to do thei proper office and dutie, for the amending and strengthening thereof, the course and motion of the Moone vnder the xii. celestiall signes of the Zodiacke, would be duly considered.

The Moone being will affected in	Fierie signes.	{ Aries and Sagittari.	{ The vertue is best comforted, for it worketh with heat and drienesse.
	Earthy signes.	{ Taurus & Virgo	{ The vertue is almost strengthened, for it worketh with colde and drienesse.
	Ayre signes.	{ Gemini first halfe of Libra & Aquarius.	{ The vertue best comforted, for it worketh with temperate heat and moistnesse.
	Watery signes.	{ Cancer last halfe of Scorpio and Piscees.	{ The vertue is best repayed, for it worketh with colde and moistnesse.

that from the change of the Moone to the first quarter, and from the full to the second quarter, the humors doe moue from the internall parts, to the outward members; as coura-geously, from the first quarter to the full, and from the second quarter to the change, they are caried by a diuers motion, from the

be outward members to the inward parts of the body.

In the first and third weekes of the ~~Year~~ it is best using  
externall manuales, as Pliebothenie, Bathes, Cupping, &c.  
But in the second and fourth weekes of the ~~Year~~ Internall  
manuales, or purging medicines, are ministered with best suc-  
cess.

If the weather is very hotte, or very colde, it is extremely  
dangerous eyther to purge or let blood, unless present and ur-  
gent necessitie require the same, as the onely most present and  
speedie remedie.

Any humors, when the ~~Moone~~ is in an ayle signe, as  
namely in Gemini, the first halfe of Libra or in Aquary.

Is best taken, the ~~Moone~~ being in a watric  
signe.

Electuaries.

Potions.

Hylls.

Cancer.

Scorpius.

Pisces.

Is generally to be commended, when the  
is well affected in Cancer Aquarius or Pisces. but in any  
wise by counsell and consent of some good and expert Physi-  
tion.

For health the ~~Moone~~ being in Aries, Leo, Sagitari-  
us: and for clemencie the being in Libra, or Pisces.

or plaster, is best applied, when the ~~Moone~~ is  
in that signe which governeth the same member to which it is  
applicable. But for the amendment of any defect or want, un-  
certaine and simple, by the use and application of the same, is  
farre otherwise: for in such a case must be remembered, that  
it is very dangerous and extremely perilous, to open a vein, or  
to make any notable incision, or cauterization in any member,  
when the ~~Moone~~ is resident in that signe which ruleth the same  
member,

 Good times for  
setting, sowing, Planting, Graf-

sheering of Sheepe, gelding of Cattell, &c.

**T**he best and most prosperous times, to set, sow, plant, and Graffe, the month or season duly considered is, when the Moon hath her course in Taurus, Virgo, or Capricornus especially betwene the change and the full.

Fell Timber to builde withall, towards the end of the last quarter, she being then in Aquarius or Pisces.

Crop Trees and fell Wood to burne, that the stocke may the better and sooner grow a gayne when the Moon is in her first quarter.

Remoue and set young Trees, in the last quarter of the Moon in Taurus, Capricornus, and that in the Months of September, October, November and February.

Cut of pyne Trees in February or March, at the encrease of the Moon she being in Taurus, Virgo or Libra.

Seld of Libbe Beastes of Cattle, the Moon in Aries, Sagittarius or Capricornus, in the waning crescent.

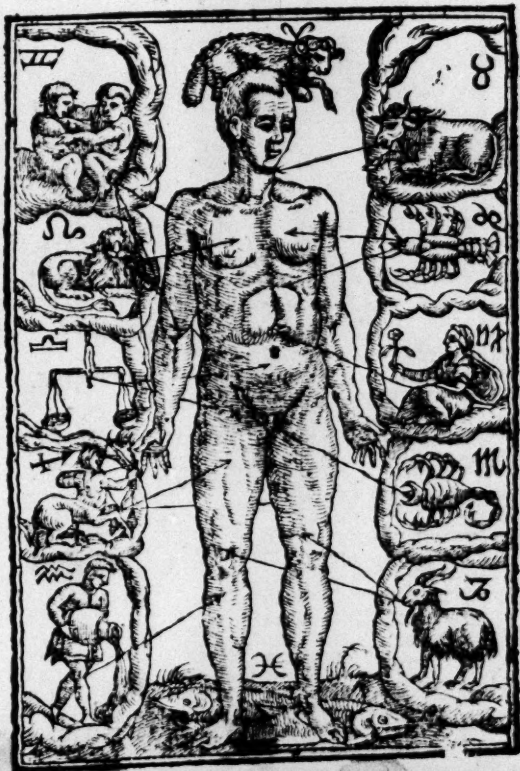

Sheere Sheepe, from the change of the Moon to the full.

Cut of haye head & beard, the Moon in Libra Sagittarius Aquarius, or Pisces, especially from the first quarter, to the full.

# A description of the foure quarters of the yeere. 1599.

## Of V Winter. ♄ ≈ ✕

**W**inter, according to our vsuall English computation, beghineth the xi. day of December, in the yeere foregoing, at the first entering of the Sunne into the first degree of the signe Capricorne: the day being then at the shortest, and the night at the longest. This season is inclinably cold and moyst, answering to the complexion of old men, and agreeable to the Element of water.

## Of the Spring. Sun in ♈ & ♊.

**T**his Spring beghineth the xi. day of March, being Sunday. The Sunne then entering into the Equinoctiall signe Aries, and rising at vi. a clocke in the morning, and setting at vi. in the evening. The day and night being then equall in length. This quarter is hotte and moyst, resembling the Sanguine complexion, and the ayrie Element.

## Of Summer.

**S**ummer beghineth the xii. day of June, when the Sunne entereth into Cancer, making the Ethiuall or Summer Solstice, to w<sup>t</sup>h, the longest day, and shortest night in the whole yeere, for now the Sunne ysleth neare three a clocke and setleth about eight. This season is ordinarily hotte and dry, compared to the Element of fire, and complexion of chollic.

## Of Haruest.

**T**he Haruest quarter, called also Autumne, is said to begin the xii. of September, so that the Sunne entereth into

## A Prognostication.

the signe Libræ, making the second Equinoctiall, the day and night iust of Equall length, accompting the day from vi. in the morning, unto vi. in the evening, that is, from the rising of the Sunne, to the setting of the same.

This quarter is naturally cold and drye, agreeable to the melancholy complexion, and Earthie Element.

What members of the body  
are gouerned by the xii Signes,  
and of the diseases to them appropriate,

Also of the change, full, and quarters  
of the Moone through-  
out the yeere.

1599.

Ianuarie 1599.

Aquarius, the signe which the Sunne entrech into the tenth day of this present Month, is of the coldest, Wat. uine, Ayre, and Sanguine, and gouerneth the legges: And sickeneses appropriate, are, Feuer quartanes, blacke Jaundies, swelling of the legges, and varicels.

The full Moone, the first day here is a clocke before noone, the Moone in Cancer, becometh moyst weather, to the most part.

The last quarter is on the 16. day, somewhat after three a clocke in the after noone, in Libra, signifieth frostie and variable weather.

The

Freend. 1599.

The new Moone the xvi. day, vi. minutes after foure o'clock in the after noone, in Aquarius, windy and cloudy to a ster.

The first quarter the xxiii. day. xxi. min. before viii. a clocke in the morning in Taurus, frost and snowe fallen.

The full Moone eclipsed the xxii. day of Januarie, about vi. a clocke in the morning: the Moone running her course in Leo. This Moone seeth with fall of snowe and freezing.

Februarie. 1599.

Pisces is of the North, feminine, watric, and flegmaticke, and tu- leeth the seete, and of sickneses, the Gout, Scabes, Leprosie, and Palsie.

The last quarter of the Moone, is on the viii. day of this moneth of February halfe an hour after ix. a clocke at nyght, in the first de- grees of the signe Sagittary, con-

tinuing most part frost and snowe, although sometimes al- teration.

The new Moone is on the xii. day, about two a clock in the morning, in Pisces, enclined to cold Steele or Rayne.

The first quarter the xxi. day. xx. minutes before x. a clocke at nyght, in Gemini, much wet and wi. dr weather.

C 3.

March

# A Prognostication.

March 1599.

Aries, into which the Sunne entreteth the xi. day of this Month, is of the East Masculine, fierce, and chollerick, & governeth the head, face, eyes, and eares, &c. And of sicknesses the Apoplexie, Hammia, woundes and sores, in the face, abhorriments, and other impiteous diseases, Ringwormes and Mophewes, &c.

Full Moone the first day, somewhat before midnight, in Virgo. This quarter of the Moone importeth some moisture at the beginning, but after, cleare and pleasaunt dayes.

The last quarter the ix. day, a quarter before ix. a clock at night in Sagittari, enclined to cloudy, moist, & windey weather.

The new moone the xvi. day, neere xi. a clocke before noone in Aries, yeelding often variable weather.

The first quarter the xxiii. day, about one a clock in the afternoon, in Cancer, giuen to loud wind, with some moisture.

The full moone the xxi. day, halfe an houre after xi. a clock in the afternoon, in the signe Libra, a goodly signe of seasonable weather.

April, 1599.

Taurus is of the South, temerous, earthie and melancholle, and governeth the necke, throte, & voice, and of sicknesses, Squinances, Scrophulous, Cathares, and Hoarsemell.

The last quarter the viii. day, somewhat before vi. a clock in the morning in Aquari, getting cloudy dayes.

Freind. 1599.

Dayes, wile some shewes and stout windes.

The new moone the xiiij. day, neere viij. a clock at nyght, in Aries, bringing goodly pleasant weather.

The first quarter the xviij. day a quarter before vi. a clock in the morning, in Leo, some kindly Apill shewes.

The full Moone the xxij. day, halfe an houre after vi. a clock in the morning in Scorpio, togethwering some moistnesse, but not of much continuance.

May. 1599.

The xiiij. day, of this instant moone the Sunne entereth into Gemini, which is of the west, masculine, Ayre, and Sanguine, governing the Shoulders, armes, and hands and of sicknesses, flegmones, ferunculuses, and other proceeding of blood in the same places.

The last quarter, the viij. day, about xi. a clocke before noone, in

Aquari, deawie mornings, and warme dayes.

The new Moone the xiiij. day, halfe an houre after v. a clock in the morning, the moone in Gemini, sayre weather for the most part.

The first quarter the xviij. day, xx. minutes before vi. a clocke in the nyght, in Virgo yeeldeth moistnes.

The full moone the xxij. day, somewhat after vi. a clocke in the evening, sayre reasonable weather.

C 4

June

# A Prognostication.

June. 1599.

This moneth the sun entreteth into Cancer, which is of the North, feminine, watte and flegmaticus & ruleth the breast, ribbes, pappes of women, Longues, Liver, and Spleene, and of sicknesses, Alopecia, wat ryes, Coughs, Rheumes, Scabbies and Leprosie.

The last quarter, the vii. day, neere iii. a clock in the afternoone, in P'sces, sometimes a shewer, but most part sayre and hot.

The new Moone the xii. day, somewhat after viii. a clock in the evening, in Gemini, enclaynd most to sayre weather, yet sometime ouercast for rayne and like to thunder.

The first quarter the xiv. day, halfe an houre after iii. a clocke in the afternoone, in Libra, hot and sultry weather, and often dashing shewers.
